ترجمه کنید.

B) Translate the following passages in to farsi.

- 1) Accounting is an information system that measures, processes, and communicates information about an identifiable entity for the purpose of making economic decisions.
- 2) Financial position is the economic resources that belong to a company and the claims against those resources.
- 3) In the double entry system, each transaction must be recorded with at least one debit and one credit so that the total dollar amount of the debits equals the total dollar amount of the credits.
- 4) Net income is the net increase in owner's equity that results from the operations of a company. Net income equals revenues minus expenses, unless expenses exceed revenues, in which case a net loss results.
